*fid*

25X1

1. The Zilina (2 50/0 95) military and civilian airfield was about 900x1,200 meters. It was serviceable only for light planes. The landing field was covered with grass and sloped slightly to the north. The soil was loamy and stony. \*
2. There was one hangar and some temporary buildings on the field. \*
3. The field was occupied by a military unit equipped with eight light trainers. Four Cap power planes, four Storchs, belonging to the local Aeroclub were used to tow gliders of the glider school located about 60 km north of the field. \*\*

25X1

Comment. For sketch of airfield, see annex. The detailed description [redacted] received for the first time. Therefore, the data cannot be verified, except for the location of the field.

25X1

Comment. The same occupation of the field was reported in December

25X1

1949 [redacted] The type of military unit is not known, but could possibly be a detached unit of a pilot school. However, the nearest pilot school is in Prostějov, southwest of Olomouc.
